

Build a Safe Space With Brainy Broccoli!

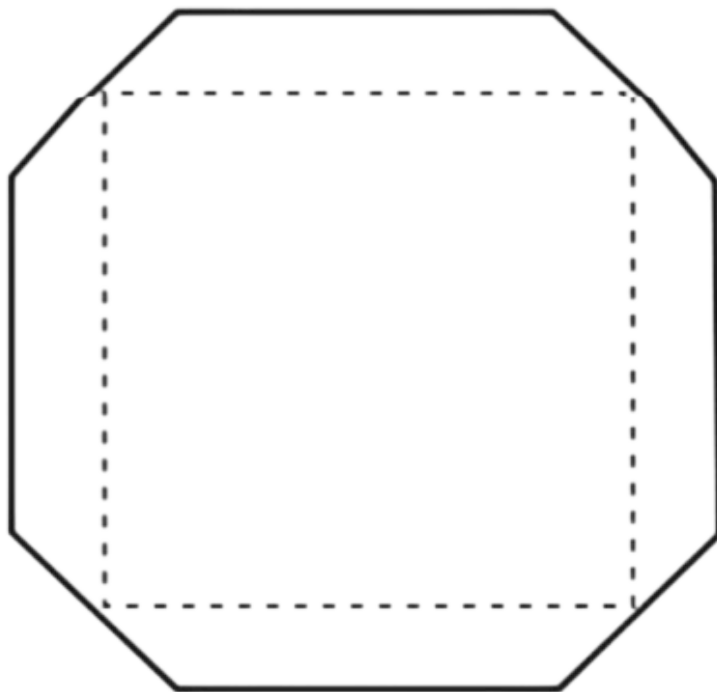

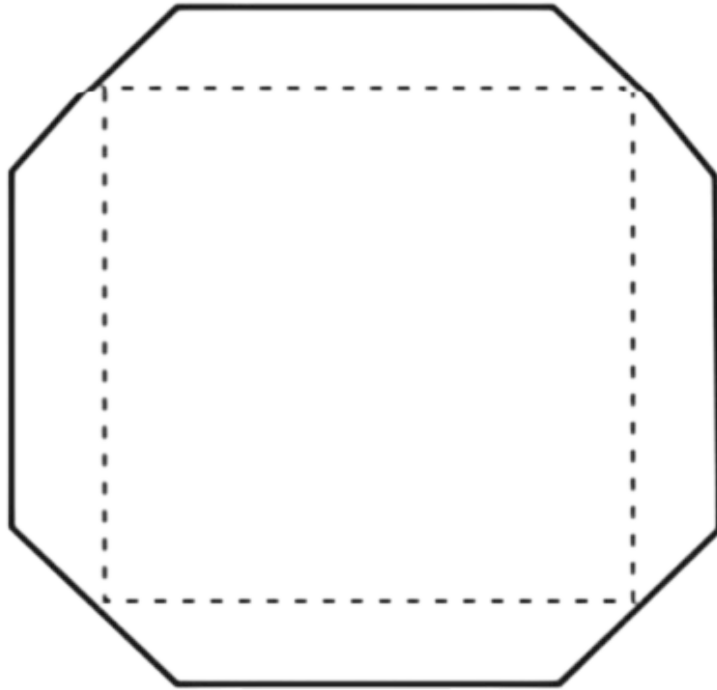

Today, you'll build you own safe space with Brainy Broccoli! You'll design your house on the outside, and inhabit it with trusted adults.

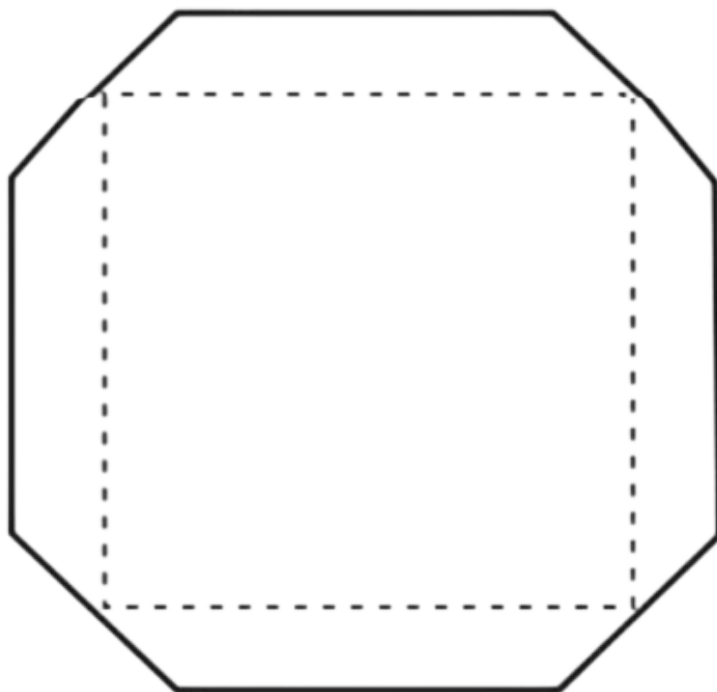

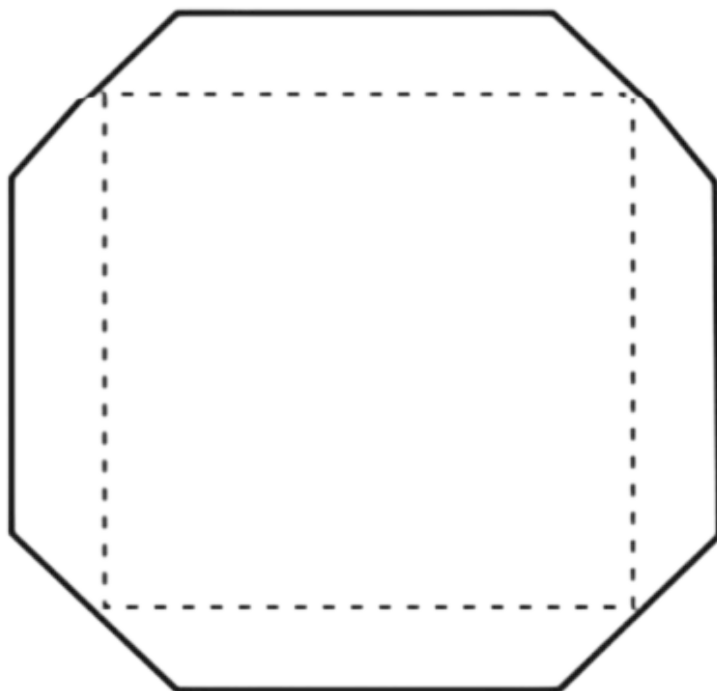

Let's go over some instructions for the activity.

1. On the next pages, there will be cutouts for the walls of the house you're going to build. Color them in first and decorate them with things or words that make you feel safe.
2. Cut each page out at the dotted lines. If you need help cutting, ask an adult.
3. Cut a door out on the front wall of the house.
4. Tape the house together using normal see-through tape.
5. Cut out the roof and place it on top.
(don't tape it so that you can see inside)
6. On the last page, color in and draw the trusted adults that will fill in your safe space.
7. Have fun!
